INTRODUCTION

This CD of proceedings contains the papers and abstracts presented at the Spatial Science Institute Biennial International Conference (SSC2007), held in Hobart, Australia, on 14-18 May 2007. The header of each paper indicates whether it is a peer-reviewed, non-refereed or abstract-only contribution. However, this does not imply that non-refereed papers are necessarily of a lower quality than refereed papers. Rather, it states which papers have gone through the review process outlined below.

Each peer-reviewed paper was refereed by at least two independent reviewers in a blind reviewing process, i.e. the identity of the author(s) was unknown to the reviewers, while the reviewers remained anonymous to the author(s). The Organising Committee therefore believes that the peer-reviewed papers contained on this CD meet the requirement of a DEST F1 conference publication.

The editors would like to thank all authors and reviewers for their contributions, thus ensuring that SSC2007 will be an exciting and informative conference. Particular thanks to the Technical Program Sub-Committee members Birgit Kruse and Michael Giudici, and the team at ICMS Pty Ltd for their assistance in compiling the proceedings.

REVIEWERS

The editors and Organising Committee would like to extend their gratitude to the reviewers, who invested their time and energy in order to offer constructive feedback and criticism on the papers submitted to the peer-reviewed stream of the conference proceedings. The reviewers are listed below in alphabetical order:

- Dr Lesley Arnold, Department of Land Information, Western Australia, Australia
- Dr Kwang-Ho Bae, Curtin University of Technology, Australia
- Mr Rohan Bennett, University of Melbourne, Australia

- Ms Gypsy Bhalla, Geoscience Australia, Australia
- Mr Andrew Binns, University of Melbourne, Australia
- Mr David Bruce, University of South Australia, Australia
- Prof William Cartwright, RMIT University, Australia
- Ms Lisa Cheong, RMIT University, Australia
- Ms Sue Choy, RMIT University, Australia
- Dr Jonathan Corcoran, University of Queensland, Australia
- Mr Rod Deakin, RMIT University, Australia
- Dr Serryn Eagleson, Curtin University of Technology, Australia
- Prof Will Featherstone, Curtin University of Technology, Australia
- Dr David Fraser, RMIT University, Australia
- Dr Linlin Ge, University of New South Wales, Australia
- Dr Payam Ghadirian, University of Melbourne, Australia
- Dr Mohsin Hafeez, CSIRO Land and Water Division, Australia
- Mr Martin Hale, Department of Sustainability and Environment, Victoria, Australia
- Ms Sue Hope, University of Melbourne, Australia
- Dr Volker Janssen, University of Tasmania, Australia
- Mr Joshphar Kunapo, Monash University, Australia
- Dr Gang-Jun Liu, RMIT University, Australia
- Ms Xiaoye Liu, Monash University, Australia
- Dr Arko Lucieer, University of Tasmania, Australia
- A/Prof Kevin McDougall, University of Southern Queensland, Australia
- Mr Hossein Mohammadi, University of Melbourne, Australia
- Dr Richard Mount, University of Tasmania, Australia
- Dr Robert Musk, University of Tasmania, Australia
- Mr Antonio Pires de Camargo, Universidade do Estado de Santa Catarina, Brazil
- A/Prof Abbas Rajabifard, University of Melbourne, Australia
- Dr Craig Roberts, University of New South Wales, Australia
- Dr Mick Russell, University of Tasmania, Australia
- Dr Emmanuel Shyllon, Curtin University of Technology, Australia
- Dr Tony Sprent, University of Tasmania, Australia
- Prof Martin Staudinger, University of Applied Sciences Wiener Neustadt, Austria
- Ms Sheelan Vaez, University of Melbourne, Australia
- Dr Christopher Watson, University of Tasmania, Australia
- Mr Peter Wheeler, Monash University, Australia
- Dr Robert Williams, Defence Science & Technology Organisation, Australia
- A/Prof Kefei Zhang, RMIT University, Australia
- Dr Xuan Zhu, Monash University, Australia

Roll on the revolution... and enjoy the conference!

TABLE OF CONTENTS

Surveying - The Cadastre and Registration

Papers:

- 114 Registering interests over land in Western Australia
Murray Dolling
- 115 ICT enabled land administration versus e-Land Administration
Mohsen Kalantari, Abbas Rajabifard, Jude Wallace and Ian Williamson
- 116 Survey accurate parcel networks as the base layer for enhanced GIS. Benefits detailed from Government and Service Utility case studies and the role of Surveyors
Craig Sandy and Ian Harper
- 117* Mapping and managing land interests
Rohan Bennett, Jude Wallace and Ian Williamson

Surveying - Spatial Information Generation

Papers:

- 129* Cadastral upgrade as a by-product of spatial data collection: A case study from regional Victoria
S. Hope, G. Menner, B. Marwick, P. Ramm, A. Kealy and G. Hunter
- 130* A history of spatial sciences on the Amery Ice Shelf, East Antarctica
Volker Janssen and Rachael Hurd
- 131* The alignment of the Australian maritime college's towing tank
A. Sprent and G.J. Macfarlane
- 340 Positional Accuracy Improvement - the UK Experience
Phillip Spivey

Underground Surveying

Papers:

- 145 The Beaconsfield Mine Tragedy Rescue - The Role of the Surveyors
Simon Arthur
- 147 Intelligent monitoring and early warning of coal mine gas protrusion and explosion based on spatial information technologies
Y. Wang, G. Liu, K. Zhang, M. Yang, X. Wei and Z. Zhang
- 146 Underground resection traversing
Luke Shepherd
- 132* Exploring Xuzhou's Guishan Hanmu from a surveyor's perspective
C. Luo, K. Deng, G. Liu, S. Zhang, Y. Wang and K. Zhang

Geodesy – Sensor Integration

Papers:

- 245 On the Role of Geodesy in the Information Revolution
Geoff Luton
- 246 Flight test of a GPS/INS/Pseudolite integrated system for airborne mapping
Jianguo Wang, Jinling Wang, Joel Barnes, David Sinclair and Leo Watts
- 247* An integrated system of dead reckoning and RFID for indoor positioning
Ming Zhu, Kefei Zhang, Falin Wu and William Cartwright
- 209* Verification of atmospheric temperature and moisture profiles derived by GPS radio occultation technique
Bertukan Biadegligne, Kefei Zhang, Graham de Hoedt, Yuriy Kuleshov and Falin Wu

Geodesy - CORS

Papers:

- 312 GPSnet - Current and future developments in GNSS CORS Network Management and Service Delivery
Martin Hale and Peter Ramm
- 313* Centimetres across Sydney: First results from the SydNet CORS network
Craig Roberts, Simon McElroy, Doug Kinlyside, Thomas Yan, Glenn Jones, Scott Allison, Farid Hendro and Sandra Hoffman
- 314 The contribution of GPS processing and analysis at Geoscience Australia to enhancing the Spatial Infrastructure in Australia
Geoff Luton
- 315* Legal Positions and Victoria's GPSnet
M. Hale, P. Ramm and J. Wallace

Geodesy - GPS

Papers:

- 328* GPS-View: Visualising geodetic GPS time series analyses
Christopher Watson and Bryn Roberts
- 329* Precise point positioning - A case study in Australia
Sue Lynn Choy, Kefei Zhang, David Silcock and Falin Wu
- 330* Towards real-time high-precision state-wide GNSS positioning through developing Australian regional atmospheric models
Kefei Zhang, Falin Wu and Suqin Wu
- 331 GDA94, ITRF and WGS84: What's the difference? Working with dynamic datums
Richard Stanaway

Geodesy - Modelling the Earth

Papers:

- 338* Geodesics on an ellipsoid - Pittman's method
R.E. Deakin and M.N. Hunter
- 339* Progress towards the new Australian geoid-type model as a replacement for AUSGeoid98
W.E. Featherstone, S.J. Claessens, M. Kuhn, J.F. Kirby, D.M. Sproule, N. Darbeheshti and J.L. Awange

Mapping Evolution 1

Papers:

- 213 Australia's national mapping program: Revolution and evolution
Simon Costello
- 214 Vicmap topographic hardcopy mapping: The 2006-2008 replacement program
George Mifsud
- 215* An imagery based land information mapping and map updating technique for rural applications
Mulalu Mulalu and Bert Veenendaal
- 216 The transit of Venus sundial
A. Sprent

Mapping Evolution 2

Papers:

- 230 Generation of Digital Elevation Model from Indian Remote Sensing Satellite Cartosat-1: Case study of DEM of Canberra ACT
R.L.N. Murthy, Mahesh Reddy and S. Mohamed Ghouse
- 231* Dynamic spatial updating: A scale-independent approach to thematic mapping and automated map revision
Lesley Arnold and Graeme Wright
- 232* WEB2.0 and collaborative publishing
William E. Cartwright
- 233 MapConnect, future direction for Geoscience Australia
Steven Ackerly

Nomenclature

Papers:

- 234 Co-ordinating Place Names in Australasia
Greg Windsor
- 235 Beyond the Polygon
Greg Windsor
- 236 Australian communities online: Using geographic names as community domain names
Paul Harcombe and Greg Windsor

Spatial Data Building Blocks

Papers:

- 106 Developing a spatial data infrastructure from the bottom up
Michael Varney
- 107* SDI to facilitate a spatially enabled society
Abbas Rajabifard, Andrew Binns and Ian Williamson
- 108* Seamless SDI model to facilitate spatially enabled land-sea interface
Sheelan S. Vaez, Abbas Rajabifard, Andrew Binns and Ian Williamson

Visualisation of Spatial Data

Papers:

- 205 Spatial considerations for uncertainty in hydrological modelling and implications for visualisation
Kim Lowell, Kurt Benke and Christopher Pettit
- 206* Interactive visualisation techniques for data mining of satellite imagery
Sam Welch, Arko Lucieer, and Ray Williams
- 207* Exploring environmental changes using integration of Augmented Reality and GIS
Payam Ghadirian and Ian D. Bishop
- 208 Mapping voting patterns at the 2004 Australia Federal Election with a web-based application
Tung-Kai Shyy, Robert Stimson, and Prem Chhetri

Spatial Data from the User Perspective

Papers:

- 222 Imagery - the next big challenge! Imagery trends, management, distribution, extraction, integration and use
Darren Mottolini, Guy Perkins and Gus Dominguez
- 223 User perspective of privacy in telematics
Muhammad Iqbal and Samsung Lim
- 224 The emergence of open source Geospatial Software
Geoff Zeiss
- 225 Redressing the gender imbalance to combat skills shortages
Marnie Leybourne

Integrating Spatial Data

Papers:

- 237* Spatial data integration challenges: Australian case studies
Hossein Mohammadi, Abbas Rajabifard, Andrew Binns and Ian P. Williamson
- 238 Building land administration systems
Ian Williamson, Stig Enemark, Jude Wallace and Abbas Rajabifard
- 239 The ACT Integrated Asset Management System
Robert Twin
- 240* Building knowledge from address information for intelligent geocoding
Emmanuel Shyllon, Bert Veenendaal and Matthew Hutchinson

Current Spatial Data Issues 1

Papers:

- 305* Building the spatial data infrastructure through data sharing: Measuring progress within Australian Local and State Government jurisdictions
Kevin McDougall, Abbas Rajabifard and Ian Williamson
- 306 Identification survey of the spatial information industry: Defining the Queensland spatial information industry
Tim Barker and Cathy Ross
- 322 Platform for Environmental Modelling Support: a Grid Cell Data Infrastructure
T.O. Chan, B. Thompson and G. Cockerton
- 321* Quality considerations for optimal positioning when integrating spatial data
Sue Hope and Frank Gielsdorf

Current Spatial Data Issues 2

Papers:

- 307 An international research survey: Cartographic generalisation practices at mapping agencies
Sharon Kazemi, Samsung Lim Linlin Ge
- 323 The Australian spatial data infrastructure: The next ten years
Peter Ramm, Frank Blanchfield and Peter Murphy
- 334 Legal implications for on-line distribution of Government fundamental spatial data
Gypsy Bhalla
- 335 Legalities of a Mashup: A view of the collision between business and interoperability
Tom Taranto

Geospatial Standards Australasia

Papers:

- 122 Geospatial standards at work in Australia and New Zealand
Garry West, Paul Harcombe, Ian O'Donnell and Russell Priebbenow
- 123 Where are we at with ISO and OGC Standards: How the Australian/New Zealand geospatial community is developing, supporting and using these standards
Chris Body
- 124 Reviewing the Australian Standard Geographical Classification
Alec Bamber

New GIS Challenges

Papers:

- 105 Geographic intelligence: Know your world through story-telling
R.J. Williams
- 103 Staying awake while counting rail sleepers: Challenges and opportunities presented by state-wide infrastructure surveys
David Presley and Andrew Bashfield
- 104 Traditional diet in a modern world: Implementing a Bushtucker SIS to communicate radiological issues
R.E. Bartolo, B. Ryan and A. Bollhofer

Innovative GIS Applications

Papers:

- 118 Spatio-temporal analysis of serial crime in Melbourne, Victoria
Lisa M. Cheong
- 119 Geographic differentiation of the Brisbane housing market
P. Chhetri, H. Han, J. Corcoran and J. Stimson
- 120 Implementing a GIS Unit: Case study of the NSW RFS
Stewart Hay
- 121 Modelling the potential reach of 'brownfields' wireless broadband
Percy Bell

GIS in Transport Management

Papers:

- 133 Design of a GIS-based traffic congestion forecast information system
Martin Staudinger, Thomas Woltron and Brigitte Rudel
- 134 Potholes, roadblocks, roundabouts and green lights: The ICSM roads working group's efforts to achieve a consistent road data model for Australasia
Simon Costello
- 135 Medal tally: Reviewing the success and impact of directions plus during and after the 2006 Commonwealth Games
Ross Caldwell
- 136* Investigating geographical differences in the mode of transport to work using circular statistics
Jonathan Corcoran, Prem Chhetri and Robert Stimson

Web-based Data Delivery 1

Papers:

- 317 Web based geospatial intelligence system
Peter Ellis and Blair Darragh
- 318 Shared Land Information Platform - powering the information generation in Western Australia
M.W. Bradford and D.M. Britton
- 319 Utilising extensible 3D (X3D) for visualising geoscience information via the World Wide Web
Dale McNally and David Beard
- 320 Facts or fiction: Consumer beliefs about spatial data quality
Anna T. Boin and Gary J. Hunter

Web-based Data Delivery 2

Papers:

- 332 Webservices - Beyond the Smart Tag project
Denise McKenzie and Bruce Thompson
- 333 Managing risks, public safety and assets spatially: Web based tree management system at Hume City Council
Recep Alakus

Environmental Modelling - Landscape

Papers:

- 110 Quantitative analysis of landscape dynamics in the Strzelecki Ranges
Zhenyu Zhang, Jim Peterson, Xuan Zhu and Wendy Wright
- 111* Mapping soil organic carbon content of organosols in Tasmania
M.-B. di Folco and M.J. Russell
- 112* A spatial (landscape ecology) metrics tool for assessing the biodiversity of agricultural land
Richard Mount, Michael Lacey and Tore Pedersen
- 113 Importance of temporal and spatial characteristics in protected areas
Seyedhamed Mirkarimi and Colin Arrowsmith

Environmental Modelling - Agriculture

Papers:

- 128 Modelling climate change impacts and adaptations: Evidence from Victorian Wheatbelt, Australia
Muhuddin Anwar, Hemayet Hossain, Remy Sietchiping, Victor Sposito and Garry O'Leary
- 126 An innovative approach to predicting future raw wood flows across the Green Triangle Region
Darren Schunke and Laise Harris
- 127 Knowledge-based expert system for agricultural land evaluation and crop selection
Thirumurugan Ponnusamy

Environmental Modelling - Flora & Fauna

Papers:

- 141* Mapping land cover changes (1947-2004) in the Lang Lang Catchment, Victoria
Narsimha Swamy Garlapati, Shobhit Chandra and Jim Peterson
- 142 Spectral characterization of fire affects in Savanna Woodland, Northern Australia
Andrew C. Edwards and Stefan W. Maier
- 143 A DEM-based approach to modelling the spatial patterns of Baw Baw Frog's (*Philoria frosti*) potential habitat suitability
Gang-Jun Liu and Greg Hollis

Environmental Modelling - Water

Papers:

- 212* Identification of the critical areas of Riparian Zones in relation to the pattern of land use and inappropriately sited septic tanks in the Woori Yallock Catchment, Victoria
J. Li, X. Zhu and J. Peterson
- 210 An integrated land and water information model for natural resource management reporting
Hayley Rokahr and Andrew McAllister
- 211* Spatial data integration for accurate parcel level sub-catchment delineation for hydrological modelling
Joshphar Kunapo, Jim Peterson and Shobhit Chandra
- 310 The application of a spatial Relative Risk Model at multiple scales in assessing the ecological risk to Australia's tropical rivers
R.E. Bartolo, R.A. van Dam and P. Bayliss

Modelling Hazards - Fire

Papers:

- 226 Wildfire risk assessment and mitigation strategies
Karl Majorhazi and Paul Hughes
- 227 A spatial analysis of fire related information from northern Australia
Andrew Edwards
- 229 Mapping the McArthur fire danger index in near real-time
Kevin Davies

Modelling Hazards - Land

Papers:

- 241 GIS data, before and after: Natural hazard risk research following Tropical Cyclone Larry
Neil Corby
- 242 National exposure information system for risk assessment
Krishna Nadimpalli and Trevor Dhu
- 243 Geomorphology as a tool in regional landslide mapping
J.M. Selkirk-Bell and C. Mazengarb
- 244* Development of algorithms for the early detection of disease outbreaks in Australia
S. Eagleson, R. Watkins, B. Veenendaal, G. Wright and A.J. Plant

Emergency Management

Papers:

- 324 Towards best practice guidelines for GIS in emergency management
John Gibson and Brendan Morris
- 325 Coordinated emergency management using spatial information
Mark Taylor
- 326 Defining a national standard for symbology for incident management systems
Graeme Martin and Michael Black
- 308* Mapping relative inundation vulnerability of land parcels on low-lying ground: Exemplification with a photogrammetrically-derived DEM-based model of Lakes Entrance, Victoria, Australia
P.J. Wheeler, J. Kunapo, J.A. Peterson and M. McMahon

Remote Sensing

Papers:

- 218* Can radar interferometry address commercial applications?
Linlin Ge, Michael Hsing-chung Chang, Yusen Dong and Chris Rizos
- 219 Where does water go: Using MODIS imagery to delineate episodic surface water in arid South Australia
Yuki Tunn, James Cameron and David Hart
- 220 Bathymetric & benthic investigation of coastal lake environments using multi-angle chris/proba hyperspectral data
Simon W. Davies and Ray N. Merton
- 221 Using off-the-shelf digital cameras for planning permit detail surveys - a comparison with conventional surveying methods
Thomas Werner

Image Classification

Papers:

- 301 Wavelet texture features for improved classification of quickbird imagery
Arko Lucieer and Harald van der Werff
- 302 Object-based image classification: A tool to assist ecologists in rangeland stratification
David Bruce and Ardavan Ghorbani
- 303 Deployment of a high quality DEM for landform classification
Xiaoye Liu, Zhenyu Zhang, Jim Peterson and Shobhit Chandra
- 304 Automated identification of alpine bogs using remote sensing and Bayesian classifiers
Michael McBain

Laser Scanning

Papers:

- 201* Plane-based self-calibration procedure for terrestrial laser scanners
Kwang-Ho Bae and Derek D. Lichti
- 202 Modelling and physical reproduction projects for large cultural heritage structures:
The Ross Bridge Case Study
J. McIntosh and D. Lichti
- 203 LiDAR data reduction for efficient high quality DEM production
Xiaoye Liu and Zhenyu Zhang
- 204* Timber inventory in wet eucalypt forest using small footprint LiDAR
Robert Musk and Jon Osborn

Education in the Spatial Sciences

Papers:

- 336* Applied geospatial techniques: An integrated approach to teaching and learning of
geospatial sciences
G. Pupedis, C. Bellman, C. Arrowsmith, L. Holden and C. Ramos
- 337 GIS in Victorian secondary schools: A 'Teachers Eye' appraisal of current
constraints and opportunities
Peter Wheeler, Xuan Zhu and James Peterson

Young Professionals Forum

Papers:

- 137 Young Professionals Mentor Program: Successful dialogue and learning
Braith McClure
- 138 Women in the spatial sciences
Penny Baldock and Renee Bartolo
- 139 Popularising spatial with ping-pong balls
Josh Forner Renee Bartolo and Paul Barnett

Poster Session

Papers:

- 401 The evolution of boundaries in Van Diemen's Land
Jennifer B. Newton
- 403 A spreading activation network model for geographic information retrieval
You-Heng Hu and Linlin Ge
- 404 A framework of environmental modelling and information sharing for urban air
pollution control and management
G. Liu, E. Fu, Y. Wang, B. Han, K. Zhang and C. Arrowsmith
- 405 Modelling self-drive tourist flows across desert Australia using VRUM
Vanessa Chewings, Dean Carson, Paul Box, Joseph Breen, Andrew Taylor and Margaret
Friedel
- 406 Space + Time = Metlink Journey Planner
David Rowlands

- 407 Analysis of time difference between the clock of WUHN IGS station and time center of Shanxi Observatory
Guigen Nie and Kefei Zhang
- 408 Surveying the Maydena Hauler
Steven Flude
- 409 Bushfire risk assessment - An integrated approach using GIS
Dale Atkinson, Volker Janssen, Arko Lucieer and Mark Chladil
- 410 Population trends of Adelie penguin (*Pygoscelis adeliae*) breeding colonies: The effects of snow accumulation and human activities
Phillippa Kate Bricher, Arko Lucieer and Eric J. Woehler
- 411 Tracking fishermen: Using GIS animal behaviour tools to quantify the spatial dynamics of abalone (*Haliotis* sp.) divers in Tasmania
Katherine Tattersall
- 412 The use of Geographic Information Systems in floodplain emergency management in Tasmania
Kim Robinson
- 413 Golf Course: A solution for housing needs? Public perception and attitudes: Case studies from metropolitan Melbourne
Eddie Cheng and Shobhit Chandra
- 416 Using field spectroscopy to determine the water content of snow
Chee Lee, Simon Jones, Chris Bellman, Marcus Reston, Jelle Ferwerda and Alex Lechner
- 417 Managing data at the Australian Antarctic data centre
Ursula Ryan
- 418 Spatial Innovations Queensland: A collaborative research and development initiative for Queensland's spatial information industry
Cathy Ross and Tim Barker
- 419 The four squares of the Queensland Spatial Information Industry: The unique and collaborative model adopted by Queensland to enhance and progress the industry
Tim Barker and Cathy Ross
